

# Lab Report Template

Title: \* a brief, concise, yet descriptive title

Statement of the Problem:

- \* What question(s) are you trying to answer?
- \* Include any preliminary observations or background information about the subject

Hypothesis:

- \* Write a possible solution for the problem.
- \* Make sure this possible solution is a complete sentence.
- \* Make sure the statement is testable, an if-then statement is recommended to illustrate what criteria will support your hypothesis (and what data would no support the hypothesis).

Materials:

- \* Make a list of ALL items used in the lab. Alternatively, materials can be included as part of the procedure.

Procedure:

- \* Write a paragraph (complete sentences) which explains what you did in the lab as a short summary.
- \* Add details (step-by-step) of your procedure in such a way that anyone else could repeat the experiment.

Results (Data):

- \* This section should include any data tables, observations, or additional notes you make during the lab.
- \* You may attach a separate sheet(s) if necessary.
- \* All tables, graphs and charts should be labeled appropriately.

Conclusions:

- \* Accept or reject your hypothesis.
- \* EXPLAIN why you accepted or rejected your hypothesis using data from the lab.
- \* Include a summary of the data - averages, highest, lowest..etc to help the reader understand your results. Try not to copy your data here, you should summarize and reference KEY information.
- \* List one thing you learned and describe how it applies to a real-life situation.
- \* Discuss possible errors that could have occurred in the collection of the data (experimental errors)
